# WELCOME

## THE RETURN OF THE ISLE OF MAN TT

It's been great to see the motorcycling community return to some level of normality in the past 12 months. This was especially the case on the Isle of Man, as the TT finally returned after a long 2 years away. It was truly remarkable to see so many RST riders in the paddock – all of them placing their trust in our products before heading to the daunting but exhilarating start line. We're so proud that our riders choose to partner with us and we never take it for granted. RST's long-standing partnership with the TT as the event's Official Safety Partner is extremely important to everyone at RST. We cannot wait to be back on the island for the 2023 TT.

## 2023 COLLECTION: OUR BEST YET

Over the past year, we've been working extremely hard to adapt and improve the fit, safety and overall performance of many of our key products. The team have also introduced a number of new products into the range, most notably the Ranger textile jacket, our newest and highest performance textile jacket in the range. We've also introduced two striking new colours in our extremely popular Pro Series one-piece suit, as well as introducing a new and improved V4.1 Evo one-piece suit, featuring a new In&Motion airbag cushion, designed to further enhance safety performance. This truly is an inclusive, world-class range and I couldn't be prouder of the team.

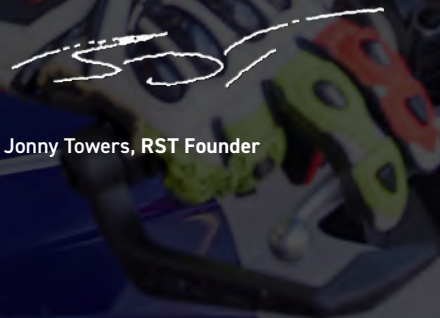

## DESIGNED IN THE UNITED KINGDOM RIDDEN AROUND THE WORLD

While we will always be a UK brand, it's becoming clearer and clearer that we truly are a global brand. With an increasingly evident presence in Australia, New Zealand, South Africa and with us emerging in new markets in South America and Asia, we're excited about the future. We've also invested heavily in factory riders in the United States (Team Hammer, MotoAmerica) and in key European markets, especially France, Germany and Spain. RST has more factory riders in the World Endurance Championship (EWC) and French Superbikes (FSBK) than in the BSB. This demonstrates our intent to continue RST's global growth at pace, while always maintaining a strong focus on the UK, too.

## THANK YOU

Finally, I'd like to thank you for placing your trust in RST once again this year. We look forward to another prosperous year for you, your family and friends.

**Trust is Everything.**

Jonny Towers, RST Founder

## NEW FOR 2023 - FEATURED PRODUCTS

There are so many new products to choose from,  
here are some highlights:

- Page 40** Isle of Man TT Brandish 2 leather jacket

# RST ARE PROUD TO BE WORKING WITH IN&MOTION – EXPERTS IN ENGINEERING WEARABLE AIRBAG SYSTEMS.

Just as armour is integrated into garments, we believe the best way to improve rider safety is to fully integrate In&motion's airbag technology into RST garments.

Our range of integrated airbag garments combine ergonomic designs, feature-rich specification, and high-end safety protection.

As with all our garments, the Airbag Range is fully tested to extremes, across global climates and terrains. We use our factory riders to inform us on how our designs fair to ultimately improve our product development.

## AIRBAG RANGE BENEFITS

### COMPREHENSIVE

- One box – multiple riding opportunities
- Wireless – no cables or sensors required

### ULTIMATE PERFORMANCE

- Protects the thorax, abdomen, spine and collarbone
- Fully CE certified garment, armour, airbag and integrated back protector required

### COMFORTABLE TO WEAR

- Ergonomic design – garments designed with the airbag in mind
- Breathable 3D mesh ensures comfort when in use

### EASY TO USE

- Three algorithms - street, track or adventure
- Electronic airbag detection system has embedded algorithms to activate the airbag

## ULTIMATE COMFORT. UNPARALLELED PROTECTION.

# HOW DOES IT WORK?

THE INTELLIGENT AIRBAG SYSTEM IS BASED ON AN EVOLVING PHILOSOPHY:

## DETECT

Thanks to embedded algorithms the smart In&box system analyses the rider's movement 1000 times a second to detect a fall

## PROTECT

In less than 33ms (detection) and 22ms (inflation), the airbag cushion is inflated to protect the most sensitive body areas

## PERFECT

The In&motion software collects all data to constantly improve its algorithm, offering even better customised protection

- + Integrated CE Certified Level 1 back protector (according to EN 1621-2 standard)
- + Reusable - After inflation deployment, the inflator can be changed by the user (up to 3 times)
- + Body areas protected: Spine, thorax, abdomen and collarbone

# GET THE IN&BOX

## SIMPLY:

1. **PURCHASE YOUR RST AIRBAG GARMENT**  
Please note, the garment is currently without the In&box required to make the airbag system work.
2. **ORDER THE IN&BOX**  
Purchase your membership and register your garment online to trigger the delivery of the In&box to you. Scan the QR code or visit [my.inemotion.com/rst](https://my.inemotion.com/rst)
3. **ACTIVATE THE IN&BOX**  
Once you have received the In&box, download My In&box app to activate it.

## V4.1 EVO KANGAROO AIRBAG

### MEN'S LEATHER SUIT

V4.1 Evo is our premium In&motion airbag equipped race suit, as used by RST's factory riders globally. Constructed with a 60/40 split of the highest quality Kangaroo and Grade A Cowhide and reinforced with Kevlar® protection, the V4.1 Evo offers you the ultimate in comfort and protection. Featuring additional external protection and ergonomic enhancements, the V4.1 Evo is more advanced than its V4.1 predecessor.

## TRACTECH EVO 4

### JACKET & PANTS

The best of the one piece suit, but in a jacket and pants option. Forged from Cowhide leather, the jacket and pants have been cut with a less aggressive stance; making it comfortable to walk around in. Offering superb levels of protection, nothing is compromised here. The removable quilted thermal gilet makes this the perfect option for all-weather track riding.

## TRACTECH EVO 4 MESH

LEATHER JACKET

This sports leather mesh hybrid jacket is all about ventilation. A K540 mesh provides four times the volume of air pockets than the TracTech Evo 4 Jacket does, making it a great choice for warmer weather riding. Combined with stretch leather motion panels for maximum comfort and movement when worn, rider convenience is at the forefront of this jacket.

## SABRE AIRBAG

LEATHER JACKET

Robust and sporty. The Sabre Airbag CE Leather Jacket, made from Cowhide leather is supported by a four-way woven stretch with motion panels throughout for maximum comfort and movement when worn, especially if the airbag is deployed. Added to this are the removable quilted thermal gilet with two pockets, a fixed Quick Dry mesh lining, panel in panel perforation to keep you warm and fresh. Finished with CE Level 1 armour, In&motion airbag technology, TPU shoulder cups and a reflective logo offers added visibility and superior levels of protection. Use the 360° connection zip to connect the jacket to any pair of RST pants including the Sabre leather pants.

## SABRE

### JACKET & PANTS

The Sabre holds a sporty edge and a range of features that deliver optimum comfort, fit and protection. Equipped with CE Certified Level 1 shoulder and elbow armour, the jacket gives you peace of mind to ride knowing the added layer of protection is there when you need it most. With the 360 connection zip, pair this with the Sabre Leather pants or any other pair of RST pants.

Paired with the Sabre Jacket with matching leather and styling, the Sabre pants is a fantastic sports/sports touring pants that perfectly complements the jacket with a connecting 360 degree zip.

## ISLE OF MAN TT BRANDISH 2

LEATHER JACKET

IOM TT Brandish 2 is named after the famous corner on the Isle of Man between Creg-ny-Baa and Hillberry. Made from a heavy-duty vintage cowhide, with a soft twill chequered lining, this jacket features vintage zip details, front entry pockets and double layer leather to the shoulder and elbows. Whether following the tracks of your TT heroes or casually riding closer to home, this jacket ensures outstanding protection and style at all times.

## ISLE OF MAN TT HILLBERRY 2

LEATHER JACKET

IOM TT Hillberry 2 is affectionately named after the Isle of Man TT's Hillberry Corner, situated at the 36th Milestone road-side marker on the Snaefell Mountain Course. A premium TT leather jacket, the Hillberry 2 is comprised of a super-soft aniline leather, resulting in a premium yet vintage appearance. A soft satin checkerboard lining is complimented by the jacket's vintage zip details, cuff adjusters and reverse leather stripes on the arms. If you love the TT - you'll love this jacket.

## PRO SERIES ADVENTURE-X

### TEXTILE JACKET & PANTS

The Pro Series Adventure-X jacket and pants is a must have for all adventure riding. Made from MaxTex – a lightweight high denier synthetic material that offers great protection and is comfortable to wear. Additionally, a Ballistic textile is overlaid over key impact areas along with the triple stitching using a coated bonded nylon thread offers increased abrasion resistance. In addition to this, an innovative X-Liner – a singular lightweight lining featuring a quilted thermal liner and SinAqua waterproof membrane combined - offers versatility. Ventilation is offered through mesh lining and multiple leg vents.

## PRO SERIES ADVENTURE X-TREME

### TEXTILE JACKET & PANTS

The Adventure X-treme is RST's first CE category B jacket & pants, designed to be worn over a base layer of armour. Designed with off-road riding in mind, the Adventure X-treme uses simplified features that are upgraded for real off-road enthusiasts. The Adventure X-treme is made with much harder wearing fabrics, making it a robust yet stylish addition to our collection.

## PRO SERIES AMBUSH

### TEXTILE JACKET & PANTS

The ultimate textile jacket when it comes to specification. Relentless development has gone into this jacket to create the Pro Series Ambush CE Textile Jacket. Loaded with multiple ventilation points, soft to the touch yet made from tough fabrics, and plenty of storage all over the jacket including pockets on both arms. We've even thought about where to store your dirty and wet gloves when you've finished the ride. So, for the first time, the addition of mesh glove storage pockets on each side of the jacket. Match it with the ambush pants, and you really have got the ultimate adventure touring combination.

## PRO SERIES PAVEWAY

TEXTILE JACKET

RST's laminated mid-length jacket. The Paveway fits in between the traditional  $\frac{3}{4}$  length touring garment and short sports garment, a truly unique offering. The jacket utilises RST's SinAqua Pro laminated technology in a mid-length jacket which is ultra-versatile. There are a number of pairing options with the Paveway; either the Commander laminated pants, regular pants, or any other textile pants in the RST collection.

## PRO SERIES PARAGON 6

### TEXTILE JACKET & PANTALON

A fully CE certified and easy to wear jacket that offers superior levels of comfort on and off the bike. Like the jacket, the pants has been designed to tackle all weather riding conditions thanks to the latest technologies. Made from Ballistic Reinforced MaxTex coated with a hydrophobic Durable Water Repellent coating, the Paragon 6 is lined with a Quick Dry mesh and a fixed SinAqua Pro lining which when combined offer incredible warmth, waterproofing and breathability. Topped with hip and knee armour providing protection in key impact areas, this pants provides peace of mind. Connect to the Paragon 6 jacket through a 360 degree zip.

## MAVERICK EVO

### TEXTILE JACKET & PANTS

The new and improved Maverick Evo jacket has an improved fit profile, with the addition of hand warmer pockets. The removable and interchangeable SinAqua waterproof membrane and quilted thermal liner allow you to take on any riding conditions with confidence. Reflective print enhances visibility in darker conditions, with large intake and exhaust ventilation areas to channel airflow for maximum ventilation. Finished with multiple storage pockets and a 360-degree connection zipper for pairing with the Maverick Evo pants (or any other RST pants) - the Maverick Evo is a premium touring option.

Our Maverick Evo pants is the perfect companion for the RST Maverick Evo jacket, versatile enough to take on any weather condition with a removable and interchangeable SinAqua waterproof membrane and quilted thermal liner and reflective print to enhance visibility in darker conditions.

## ENDURANCE

### TEXTILE JACKET & PANTS

Go the distance with the endurance. This is a jacket that you can wear all day in the saddle. Made from hard wearing fabrics in a full-length touring cut. Equipped with multi-point ventilation, invisible reflex, generous pockets and hand warmer pockets. Unique to the jacket is a vent system on the shoulders designed to hold the vents open and direct air down the back of the rider. A cuff ventilation system is unique to the Endurance too. Pair with the pants for the ultimate two-piece touring option.

## RST X KEVLAR® DISTRICT WAX

TEXTILE SHIRT

An understated look yet packed with protection – no one would know this is a motorcycle protective garment. Made from a HD Wax fabric, the shirt features a Kevlar® Fibre lining and is supported by a contrast tartan inner lining and fixed mesh lining for extra breathability. CE Certified to Level A, the shirt has CE Level 1 shoulder and elbow armour with a pocket for a back protector. Added features include a central front zip with a popper fastening overlay for added safety. Added to this are the side seam air vents for maximum air flow and magnetic collar fastening.

BLUE CHECK

# 169,95 € RST X KEVLAR® LUMBERJACK SHIRT

TEXTILE SHIRT

This shirt is reinforced with Kevlar® to offer armour and abrasion resistance in a more casual styled textile motorcycle garment. Fully CE approved to Level A, the RST x Kevlar® Lumberjack Shirt features CE level 1 shoulder and elbow armour as standard and pocket for a back protector. The jacket has a protective Kevlar® barrier throughout for abrasion resistance. Made from cotton, this makes the Lumberjack a lightweight and comfortable shirt. The dual action zip and popper closure system on the cuffs, outer pockets and the shirt, offer both increased ventilation as required and this double closure ensures the shirt will not pop open.

## RST X KEVLAR® HEAVY DUTY

### TEXTILE SHIRT

Reinforced with Kevlar®, this shirt offers armour and abrasion resistance in a more casual styled textile motorcycle shirt. Fully CE approved to Level A, this heavy-duty shirt is a hard wearing and durable motorcycle shirt. The shirt features CE level 2 shoulder and elbow armour as standard and a pocket for a back protector. The jacket has a protective Kevlar® barrier throughout for abrasion resistance. Additionally, it is made from Cordura® cotton which ultimately makes this a lightweight and comfortable shirt. Zipped cuffs and the popper closure system on the cuffs, outer pockets on the shirt, offer both increased ventilation as required and ensures the shirt will not pop open.

## RST X KEVLAR® SINGLE LAYER

TEXTILE JEAN

Built with Kevlar® - This CE rated Level AA jean takes inspiration from the fashion industry, using innovative techniques to offer a stylish garment which has superior protection to match. Denim and Kevlar® are pre-woven together to create a single layer denim with high protective capabilities that remains lightweight and soft, whilst the tapered leg offers a contoured fit. The CE Level 1 armour sits in a cotton pouch which can be securely fixed into the full length knee armour pocket with hook & loop fasteners, allowing it to sit exactly where it is needed – on the knee, aiding comfort levels and improving the protective capabilities of the armour.

**TRACTECH EVO 4**  
MEN'S GLOVE

Built with Kevlar™ - the TracTech Evo 4 glove combines the best of previous TracTech gloves with more features for a superb fit, comfort and protection. Made with both full-grain cowhide and kangaroo leather, the glove features a Carbon Knuckle Protector for impact protection. This glove maximises protection by using DuPont™ Kevlar® Fibre on the palm stitching and underlay, along with double layer kangaroo leather and an RST palm slider to protect the palm. The double wrist and cuff closure offers a secure fit, while DuPont™ Kevlar® lining throughout the rest of the glove prevents tearing. Elasticated conjoined fingers prevent "finger roll", without affecting reach or flexibility when changing gear. The glove has a perforated outer to maximise airflow, digital leather panels on the palm and forefingers to enhance grip, a memory foam panel to the back of the hand to aid comfort and support, with pre-curved fingers to suit the contour of the hand on the handlebars. The TracTech Evo 4 Glove offers no compromises – a high performance race glove for fast riders.

## PRO SERIES PARAGON 6 HEATED

MEN'S WATERPROOF GLOVE

This is one of the best CE Certified heated, waterproof gloves on the market. The CE Certified Level 1 KP glove is made from a hardwearing HTC fabric and a full grain leather padded palm with silicone grips for extra support. The pre-curved fingers also feature motion panels for extra comfort and movement in use. The smart touch fabric on the index fingers and thumb and the visor wiper on the index finger are designed to keep you riding. It has a soft feel polyester lining and features a SinAqua waterproof lining to keep hands dry. The rubber control button and LED indicator have been repositioned and are now recessed into the glove, improving ergonomics, so you can turn the heat on and off and cycle through the three heat levels easily whilst riding and adapt as required.

## FRONTIER BOOT

**MEN'S BOOT**

This sneaker style boot has a flatter sole which is easier to walk around in. Made from heavy-duty microfibre and reinforced with a Ballistic fabric, the boot has integrated heel and ankle protection and a rubberised shift pad for enhanced comfort. For added security, the lace and hook & loop closure system also features a lace garage which tidily secures the lace ends away, preventing the lace getting trapped around the bike. This is a great breathable summer boot!

## PATHFINDER

**MEN'S WATERPROOF BOOT**

The Pathfinder is CE Certified, the boot has a TPU shin protector with an integrated ankle protector. It has a floating shift pad as used on the TracTech boots - this means the shift change pad does not wrap round the boot providing more comfort when you're on the bike. To further support the comfort levels, there are reflective, textile motion panels at the front and the rear of the boot. The double sided zips and hook & loop panels open up enabling the front of the boot to pivot away. The outsole has been designed specifically for touring - it features hard-wearing deep grooves perfect for the touring rider, offering good grip on the bike.

## MAVERICK EVO

### LADIES TEXTILE JACKET & PANTS

The new and improved Maverick Evo jacket has an enhanced fit profile, the addition of hand warmer pockets and an adjustment upgrade from the original Maverick jacket. The SinAqua waterproof membrane and quilted thermal liner allows riders to take on any riding conditions with confidence. Reflective print enhances visibility in darker conditions, with large intake and exhaust ventilation areas channel airflow for maximum ventilation. Finished with multiple storage pockets, a 360-degree connection zipper for pairing with the Maverick Evo pants (or any other RST pants) - the Maverick Evo is a premium touring option.

## ENDURANCE

### CE LADIES TEXTILE JACKET & PANTS

Endurance by name, endurance by nature. This is a jacket that you can wear all day in the saddle. Made from hard wearing fabrics in a full-length touring cut. Equipped with multi-point ventilation, invisible reflex, generous pockets and hand warmer pockets. Unique to the jacket is a vent system on the shoulders designed to hold the vents open and direct air down the back of the rider. A cuff ventilation system is unique to the Endurance too.

# CE TESTING

## CLOTHING

### CE STANDARD EN17092:

TESTED FOR:

- SLEEVE RESTRAINT – To avoid user's body being exposed in an accident.
- TEAR STRENGTH AND SEAM STRENGTH – To avoid clothing bursting open.
- ABRASION RESISTANCE – To avoid damage due to the road surface.
- FIT AND ERGONOMICS – To ensure the glove is comfortable to wear when riding.
- IMPACT PROTECTION – To avoid injuries caused by hitting solid objects.
- MATERIAL ZONING – To ensure materials in areas most at risk offer additional protection (for example, elbow area).

There are five levels of protection offered by RST:

#### LEVEL AAA

Designed to the highest level of protection, however there may be ergonomic or weight penalties associated with use.

#### LEVEL AA

Offers a balance between the level of protection available and any ergonomic or weight penalties associated with its use.

#### LEVEL A

This offers a lower level of protection and is designed to reduce ergonomic and weight penalties. The intended use for this level is where conditions would make higher levels more inappropriate. For example in warmer weather conditions.

#### LEVEL B

Offers limited protection against abrasion injuries, equivalent to Level A. It is recommended that these garments are worn with separate impact protectors for more complete protection.

#### LEVEL C

Designed to be ridden with a level B garment. Level C garments contain impact protectors only, and is not tested for abrasion. For complete protection, these must be worn with a level B over garment.

## IMPACT PROTECTOR

### CE STANDARD EN1621:

TESTED FOR:

- MINIMUM DIMENSIONS – To ensure good coverage of protection.
- IMPACT PROTECTION – To avoid injuries caused by hitting solid objects.
- FIT AND ERGONOMICS – To ensure the protector is comfortable to wear when riding.

There are two levels of protection offered by RST:

#### LEVEL 1

This offers a lower level of protection and is designed to reduce ergonomic and weight penalties.

#### LEVEL 2

Designed to the highest level of protection, however there may be ergonomic or weight penalties associated with use.

## GLOVE

### CE STANDARD EN13594:

TESTED FOR:

- CUFF LENGTH AND GLOVE RESTRAINT – TO AVOID USER'S HAND BEING EXPOSED IN AN ACCIDENT.
- TEAR STRENGTH AND SEAM STRENGTH – TO AVOID GLOVE BURSTING OPEN.
- CUT RESISTANCE – TO AVOID DAMAGE DUE TO SHARP OBJECTS.
- ABRASION RESISTANCE – TO AVOID DAMAGE DUE TO THE ROAD SURFACE.
- FIT AND ERGONOMICS – TO ENSURE THE GLOVE IS COMFORTABLE TO WEAR WHEN RIDING.
- IMPACT PROTECTION – TO AVOID INJURIES CAUSED BY HITTING SOLID OBJECTS.

There are three levels of protection offered by RST:

#### LEVEL 1

Gloves designed to give protection whilst offering lower ergonomic penalties.

#### LEVEL 1 KP

KP – As Level 1, but with addition of impact protection test for the knuckle.

#### LEVEL 2 KP

Gloves offering increased protection, however there may be weight or ergonomic penalties associated with their use.

## BOOT

### STANDARD CE EN13634:

TESTED FOR:

- HEIGHT OF UPPER – TO ENSURE GOOD COVERAGE OF PROTECTION.
- CUT RESISTANCE – TO AVOID DAMAGE DUE TO SHARP OBJECTS.
- ABRASION RESISTANCE – TO AVOID DAMAGE DUE TO THE ROAD SURFACE.
- FIT AND ERGONOMICS – TO ENSURE THE BOOT IS COMFORTABLE TO WEAR WHEN RIDING.
- TRANSVERSE RIGIDITY – TO AVOID DAMAGE DUE TO CRUSHING.

The Boots CE Level is split into four sections, this is shown on the product as:

**A B C D** With each section being either **LEVEL 1** (designed to give protection whilst offering lower ergonomic penalties) or **LEVEL 2** (offering increased protection, however there may be weight or ergonomic penalties associated with this)

- A** – Height of Upper (Level 1 = Ankle Height, Level 2 = Shin Height)
- B** – Abrasion Resistance
- C** – Cut Resistance
- D** – Transverse Rigidity

In addition, there are a number of optional tests, including:

- IPA / IPS – IMPACT PROTECTION FOR THE ANKLE (IPA) OR SHIN (IPS)
- WR – RESISTANCE TO WATER PENETRATION

# GLOSSARY

## AMARA

Soft suede-like microfibre noted for its durability.

## ANILINE WAXED LEATHER

This leather is drum dyed with special aniline dyes that permeate the entire hide, it is then finished with a special wax treatment that gives a premium fashion look whilst retaining high levels of abrasion and tear strength.

## BALLISTIC

A densely woven, heavy weight Polyester fabric using fine fibres that offers extreme abrasion resistance, tear and cut strength.

## BONDED NYLON THREAD

Used in leather garments, Bonded Nylon is stronger than regular Nylon threads. The bonding agent which coats the Nylon fibres give this thread added strength and reduces friction at the needle resulting in smooth and strong stitches.

## CORDURA®

Strong, versatile fabric, great for combatting the toughest environments. Helps protect against tears, scuffs and abrasions.

## CORESPUN POLYESTER THREAD

Used in textile garments, Corespun Polyester has extreme tensile strength and works with a wide range of textile fabrics. The high strength core offers additional strength and abrasion resistance compared to staple spun thread.

## CRC

A specially woven Nylon / Polyester / Elastane mix that has up-to a 6% stretch for enhanced comfort and ergonomics.

## DWR

A durable water repellent treatment to the outer fabric, helping water to bead off and reducing the risk of the fabric wetting out.

## FULL GRAIN LEATHER

Full grain leather that offers excellent abrasion and tear strength. Each hide is visually inspected and batch tested before being selected for use by one of our in-house craftsmen.

## HIPORA®

A three-layer micro-porous silicone coated waterproof and breathable membrane used in boots and gloves.

## HTC

HTC is a high tenacity Nylon fabric that combines outstanding levels of abrasion and tear strength and is highly supple and offers excellent levels of comfort.

## KANGAROO

Kangaroo leather has up to 10 times the tensile strength compared to standard cowhide, enabling a lower thickness to be used. This guarantees excellent abrasion and tear strength whilst offering maximum comfort and enhanced ergonomics.

## KEVLAR®

DuPont™ Kevlar® has a unique combination of high strength, high modulus, toughness and thermal stability. It was developed for demanding industrial and advanced-technology applications.

## K-492 MESH

This mesh fabric gives a high level of abrasion and tear strength whilst allowing a large volume of airflow, used in low risk zones combined with other main fabrics.

## K-540 MESH

With larger holes (4 times larger than K-492) K-540 mesh fabric flows a massive amount of air whilst still providing protection against abrasion, tear and cut strength.

## MAXTEX

MaxTex is a 600 denier Polyester fabric that offers a good balance of protection and ergonomics. Developed exclusively for RST, MaxTex offers a higher abrasion resistance than regular 600 denier Polyester.

## MICROFIBRE

Synthetic leather ideally suited for boots. Easily shaped to aid construction, water repellent and resistant to stretching.

## MOTION PANEL

An area of accordion panel stitched leather or fabric backed with elastic to offer greater ergonomics and easy natural movement whilst wearing the garment.

## PREMIUM DRUM DYED COWHIDE

The highest quality hide, drum dyed and treated with special silicones, only full-grain leather is used. This leather offers superior abrasion and tear resistance and is super-soft and supple.

## REFLEX

Reflective material, can either be laminated to the outer fabric or as piping.

## RIPSTOP

Ripstop Nylon is extremely tough. Ideal for use in garments that will be worn in the toughest conditions.

## SINAQUA

A three-layer durable waterproof and breathable membrane offering breathability of 5000 g/m<sup>2</sup>/24h of and a waterproof rating of over 10000mm/cm<sup>3</sup>

## SINAQUA PRO

An ultra-durable three-layer waterproof and breathable membrane, offering exceptional breathability 11500 g/m<sup>2</sup>/24h of and a waterproof rating of over 15000mm/cm<sup>3</sup>

## SINAQUA PRO LAMINATE

An ultra-durable three-layer waterproof and breathable membrane, offering exceptional breathability 11500 g/m<sup>2</sup>/24h of and a waterproof rating of over 15000mm/cm<sup>3</sup> laminated to the outer fabric.

## SUPERFABRIC®

SuperFabric® material provides high levels of protection and is especially touted for its abrasion resistance.

## SYMPATEX®

A highly breathable 4-layer waterproof membrane used in footwear and gloves. Footwear and gloves with Sympatex deliver excellent performance, protection and wear comfort in all weather conditions.

## THERMAL LINING

Available in 3 weights;150g / 200g / 300g the higher the weight the thicker the lining, offering greater thermal retention.

## TPU SHOULDER / KNEE CUPS

External cups positioned over the Armour to deflect the energy of an impact. Made of Thermoplastic Polyurethane with a low coefficient of friction.

## VX

A lightweight special woven Nylon/Polyester mix that has a soft and supple hand feel. VX is highly protective and enables enhanced levels of tailoring of garments where this fabric is used.

## VX-R

A medium weight special woven Nylon/Polyester mix that has a soft and supple hand feel. VX-R is highly protective and enables enhanced levels of tailoring of garments where this fabric is used.

## WAX COTTON

Synthetic wax is pre-impregnated into the cotton for a modern take on the traditional wax look. This fabric offers excellent protective qualities.

## 4-WAY WOVEN STRETCH

High tenacity Nylon woven stretch fabric incorporating ultra high abrasion resistant fibres and a multi-directional stretch capacity.

# RST FIT PROFILES

## RACE

An uncompromising fit, designed to offer the rider the ergonomics and ease of movement in the most demanding environments whilst on the bike. Developed at the Isle of Man TT – exactly the same fit as our race suits used by our RST factory riders.

## TRACK

Still uncompromised and focused for comfort on race and track bikes, but with 50 less arm and leg angle and slightly longer in the body to offer more comfort when off the bike.

## SPORTS

A hybrid fit that offers a large range of movement on the bike but is also comfortable in a more upright riding position, equally at home on both the road and the track.

## TOUR

Tailored with thousands of hours of development to give the rider the maximum level of comfort in an upright riding position. With varying front and back lengths, position. With varying front and back lengths to ensure weather protection and comfort for all-day riding. Also designed to be as comfortable when off the bike. Textile jeans are long enough to cover boots when in the riding position – up to three leg lengths are offered.

## ADVENTURE

An evolution of our touring fit profile but adapted with more aggressive movement in mind – comfortable when stood up on the pegs. Also designed to give a large range of movement off the bike too. Developed and proven at the Dakar Rally!

## URBAN / CLASSIC

Taking inspiration from the fashion world but adapted for riding, the urban / classic cut ensures the rider is both comfortable and stylish on and off the bike.

## HOW TO MEASURE ?

- A. CHEST Measure around the fullest part, under the armpits, keep tape horizontal.
- B. WAIST Measure around your waist, where you usually place your belt when wearing everyday trousers.
- C. HIP Measure around your the fullest and widest part of your hip/rear, keep tape horizontal.

If you are unsure about your measurement, our sizing reflect the size from everyday clothing brands. If you currently wear a size 36 jean, please order an RST size 36. For additional sizing information, please email RST moto or visit your local RST dealer.
