TRY THE NEW BETTER BRAKES

FOR A BETTER BRAKE PERFORMANCE

We all need to do what we can to reduce our environmental impact, motorcyclists are no exception. Just not at the expense of performance!
SBS has refined its compounds to do exactly that, while also improved the brake performance throughout the brake pad lifetime. Get the improved lever feel, improved recovery, high heat resistance and stronger initial bite you seek, with the new SBS Better Brakes HF, HS and MS.

Better brakes, for a better ride. Go Ahead.

More see page 4-5.

BETTER BRAKES

REFINED COMPOUND

Brake compounds are 100% Copper- and Nickel-free, and for ceramic compounds also Antimony-free.

IMPROVED BRAKE PERFORMANCE

A better and more stable brake performance and stopping power.

NUCAP NRS TECHNOLOGY

Always equipped with the powerful bonding technology that binds the friction material to the backing plate and improves heat resistance.

HOW TO CHOOSE
YOUR BRAKE PADS

GO AHEAD

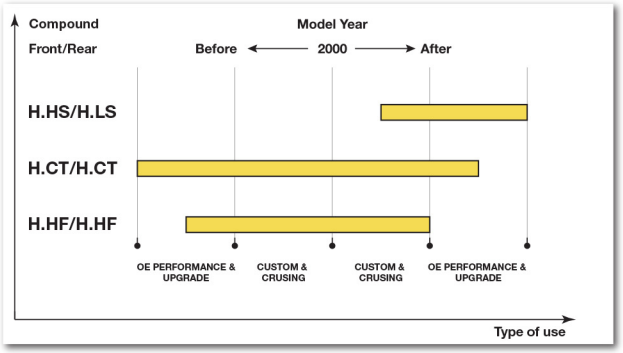

THE RIGHT CHOICE FOR YOUR MOTORCYCLE AND YOUR RIDING STYLE.

1. Choose your motorcycle type "Street Motorcycles", "American Motorcycles", "Scooter", "Road Racing", "Off Road", "ATV".
2. Find your "Type of use" in the matching diagram.
3. Pick the compound matching your needs and requirements.
4. Go to the "Motorcycle Model Applications" section to find your bike and matching SBS brake pad numbers.

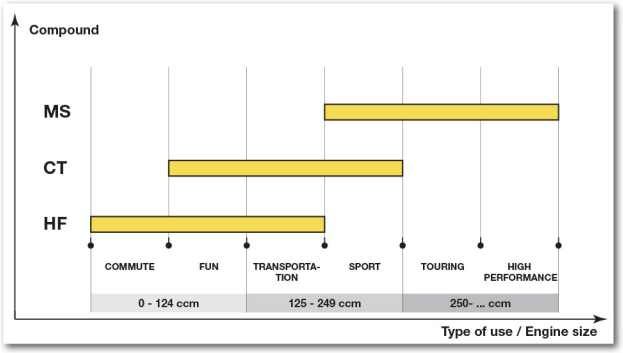

STREET MOTORCYCLES

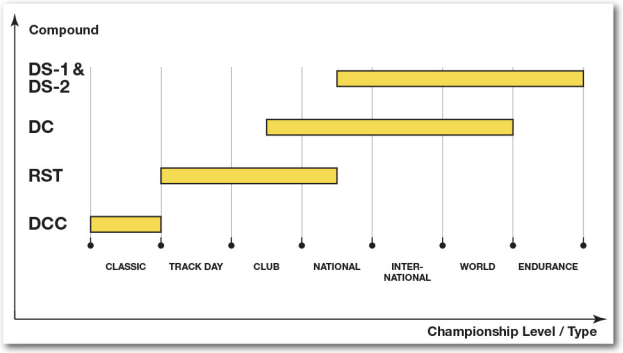

AMERICAN MOTORCYCLES

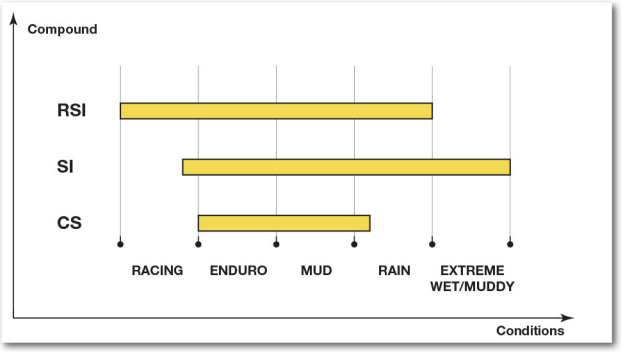

SCOOTER

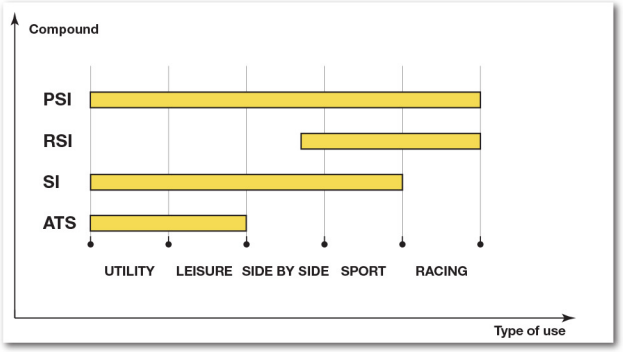

ROAD RACING

OFF ROAD

ATV

Choose ATS compound for older Arctic Cat and Polaris with **plain steel discs**.

WELCOME TO SBS

SBS Friction A/S is a Danish based company that develops, produces and markets brake pads and friction solutions for motorcycles, scooters, ATV/UTVs, special cars and industrial applications including wind turbines.

Further, our product range includes other brake components such as brake discs, brake shoes and accessory parts such as brake pins.

Our history goes back to 1964. In the 1970s we were the first to introduce aftermarket disc brake pads for motorcycles. Since then we have continuously expanded our range, and our market coverage is almost complete no matter make, model or year. We are first with the newest and last with the oldest.

We are number #1 in the European aftermarket for motorcycle brake pads, and all over the globe the SBS name is known for braking excellence. Totally, our distribution network is spread to around 50 countries around the world including USA, Canada, Japan, Australia, Singapore, South Africa and across the European Union.

Our customer portfolio comprises motorcycle industry OEMs such as brake system and vehicle manufacturers, and due to our specialist friction know-how other industries such as wind turbines manufacturers are also supported.

Our headquarters, R&D, production and sales are located in Svendborg, Denmark. Our production plant features around 12,000 sqm. with production lines for ceramic, sintered and carbon material components.

We employ around 200 people and our turnover has increased steadily since we introduced our first brake pad. Today we are market leading.

Just Go Ahead - We have the power to stop you!

BIENVENUE DANS SBS

SBS Friction A/S est une société danoise qui développe, produit et commercialise des plaquettes de frein et des solutions de friction pour les motos, les scooters, les quads ou autres véhicules TT, les véhicules spéciaux et les applications industrielles comme les éoliennes.

Notre gamme de produits comprend en outre d'autres composants de freinage comme les disques de frein et les segments de frein, mais aussi des accessoires comme les axes de frein.

Notre histoire a commencé en 1964. Dans les années 1970, nous avons été les premiers à proposer des plaquettes de frein de rechange pour les motos. Depuis, nous avons continué à développer notre gamme et notre couverture du marché est aujourd'hui pratiquement totale, quels que soient la marque, le modèle ou l'année. L'innovation est notre marque de fabrique !

Nous sommes numéro 1 sur le marché européen des plaquettes de frein de l'après-vente pour motos et la marque SBS est synonyme d'excellence dans le domaine du freinage partout dans le monde. Au total, notre réseau de distribution est présent dans près de 50 pays répartis sur toute la planète, y compris aux États-Unis, au Canada, au Japon, en Australie et dans l'Union Européenne.

Notre portefeuille de clients regroupe des OEM du marché de la moto tels que des fabricants de systèmes de freinage et des constructeurs automobiles, mais aussi des constructeurs d'éoliennes grâce à notre savoir-faire en matière de friction.

Notre siège social, notre service R&D, notre site de production et notre service commercial se trouvent à Svendborg, au Danemark. Notre site de production s'étend sur près de 12 000 m² et nos chaînes produisent des composants en céramique, frittés ou en carbone.

Nous employons près de 200 personnes et notre chiffre d'affaire n'a fait qu'augmenter avec une belle régularité depuis la production de nos premières plaquettes de frein. Nous sommes désormais leader du marché.

Pour mieux dire, nous avons le pouvoir de vous faire freiner !

BRAKE PADS APPROVED ACCORDING TO ECE R90

The ECE R90 regulation specifies design, construction, and performance requirements and test protocols for replacement brake parts for road going motor vehicles.

SBS has as an industry-first received full approval according to the new ECE R90 regulation. You can see on the product pages (pages 7 – 25) which ones are marked “ECE R90 approved”. All future introductions are designed to meet the approval of the ECE R90 regulation.

YOUR SAFETY – YOUR BENEFITS

ECE R90 tests speed sensitivity and cold performance. Since the lining is part of the braking system converting the vehicle’s kinetic energy into heat, the lining must be capable of surviving high temperatures without excessive wear (leading to frequent replacement) or outgassing (which causes brake fade, a decrease in the stopping power of the brake).

Furthermore ECE R90 requires correct marking of the products and sealed packaging.

A factory & test equipment approval is also part of the R90 homologation. It involves engineers inspecting and accrediting the factory once a year. SBS of course holds the approval for both manufacturing and testing facilities.

Type-approval to ECE R90 is required for all replacement brake linings throughout the European Union and in non-European countries that have adopted ECE Regulations.

HOW TO TEST – THE PRACTICALITIES

The brake pads are divided into 3 categories – A, B and C - depending on area of the friction material, and all compounds are tested individually.

All vehicles recommended for the specific brake pad compound must be calculated according to the kinetic energy to find the most severe vehicle for testing.

This way all compounds and vehicles are checked and the most severe combinations tested on track, for the consumer to get a very safe and secure product.

In short : your guarantee for reliable OEM replacement quality.

When you choose an Aftermarket replacement brake pad, we strongly recommend you check that the ECE R90 approval has been granted. With SBS you are safe – all our brake pads for public road use have been fully approved for all shapes, vehicle applications and compounds. Contact our Customer Service for more information: sbs@sbs.dk.

PLAQUETTES DE FREIN HOMOLOGUÉES SELON LA NORME ECE R90

La réglementation ECE R90 définit les exigences de conception, de construction et de performances ainsi que les protocoles de test des pièces de freinage de rechange destinées aux véhicules routiers à moteur.

SBS a été promue industrie conforme à la nouvelle réglementation ECE R90. Vous pourrez voir dans les pages d’informations (page 7 à 25), lesquels parmi nos produits sont des « produits homologués ECE R90 ». Tous les nouveaux produits sont conçus pour répondre aux exigences de la réglementation ECE R90.

VOTRE SÉCURITÉ – VOS AVANTAGES

La réglementation ECE R90 teste la sensibilité à la vitesse et les performances à froid. La garniture faisant partie intégrante du système de freinage en convertissant l’énergie cinétique du véhicule en chaleur, elle doit être capable de résister à de fortes températures sans usure excessive (qui conduirait à un remplacement fréquent) ni dégazage (qui causerait une perte d’efficacité des freins et une diminution de la puissance de freinage).

La réglementation ECE R90 requiert en outre un marquage correct des produits et un emballage scellé.

L’approbation des équipements et tests d’usine fait également partie du processus d’homologation R90. Ceci implique l’inspection de l’usine et son accréditation par des ingénieurs une fois par an. SBS a bien sûr obtenu l’approbation à la fois de ses installations de test et de ses sites de production.

L’homologation ECE R90 des modèles est requise pour toutes les garnitures de frein de rechange dans l’Union Européenne, ainsi que dans les pays non européens ayant adopté les réglementations ECE.

MÉTHODE DE TEST - MODALITÉS PRATIQUES POUR UNE GARANTIE DE QUALITÉ SUPÉRIEURE

Les plaquettes de frein sont divisées en 3 catégories (A, B et C) en fonction du matériau de friction, et tous les composés sont testés individuellement.

Tous les véhicules recommandés pour un composé de plaquette de frein spécifique doivent faire l’objet d’un calcul de l’énergie cinétique afin de trouver le véhicule le plus exigeant pour le test.

De cette manière, tous les composés et tous les véhicules sont contrôlés, et les combinaisons les plus exigeantes sont testées sur piste, afin que le client bénéficie du produit le plus sûr possible.

En résumé : c’est la garantie d’une qualité et d’une fiabilité des pièces de rechange dignes des pièces d’origine.

Lorsque vous choisissez une plaquette de frein de rechange Aftermarket, nous vous recommandons vivement de vérifier que l’homologation ECE R90 a été accordée. Avec SBS, vous êtes en sécurité : tous nos matériaux destinés à une utilisation sur route ont été entièrement approuvés pour toutes les formes, applications de véhicules et composés. Veuillez contacter notre service clientèle pour plus d’informations. sbs@sbs.dk.

NEW!
SBS BETTER BRAKES

SBS is introducing a new type of compound that is both purer in composition and has improved performance characteristics. We call it SBS Better Brakes.

January 1st 2023 marks the launch of the first product series being transitioned into the new SBS Better Brakes compounds, HF, HS and MS. The new compounds are designed with purification and performance in scope. Sinter compounds will not contain copper and nickel - instead they are designed on an iron-based formula. HF compounds are purified and without antimony*.

0% COPPER *(for Sintered brake pads)*
NICKEL *(for Sintered brake pads)*
ANTIMONY *(for Ceramic brake pads)*

THE IDENTIFYER

To differentiate the old from the new, SBS is introducing the symbolic "Better Brakes icon" to its packaging. We do so also because product references (e.g. 706HS or 146MS) will remain as they are today, for the convenience of riders, dealerships and distributors.

TRANSITIONING PHASE

The first products to transition into SBS Better Brakes are HF, HS and MS. Production of SP will discontinue as of January 1st 2023. All SP product references will be merged into HS, making the preferred selection easier, based on a good-better-best principle.

Next in line in the transition plan by mid-2023 is the transition of RQ and CT products, followed by the transition of LS products and in 2024, SI products.

NOUVEAUTÉ!
SBS BETTER BRAKES

SBS présente aujourd'hui un nouveau type de composé, à la fois plus pur dans sa composition et offrant des performances améliorées. Son nom : SBS Better Brakes.

Le 1er janvier 2023 marque le lancement des premières gammes de produits à utiliser les nouveaux composés SBS Better Brakes : HF, HS et MS. Ces nouveaux composés ont été conçus avec comme objectifs la purification et les performances. Les composés frittés ne contiennent ni cuivre, ni nickel. Ils sont conçus à partir d'une formule à base de fer. Les composés HF sont purifiés et sans antimoine.*

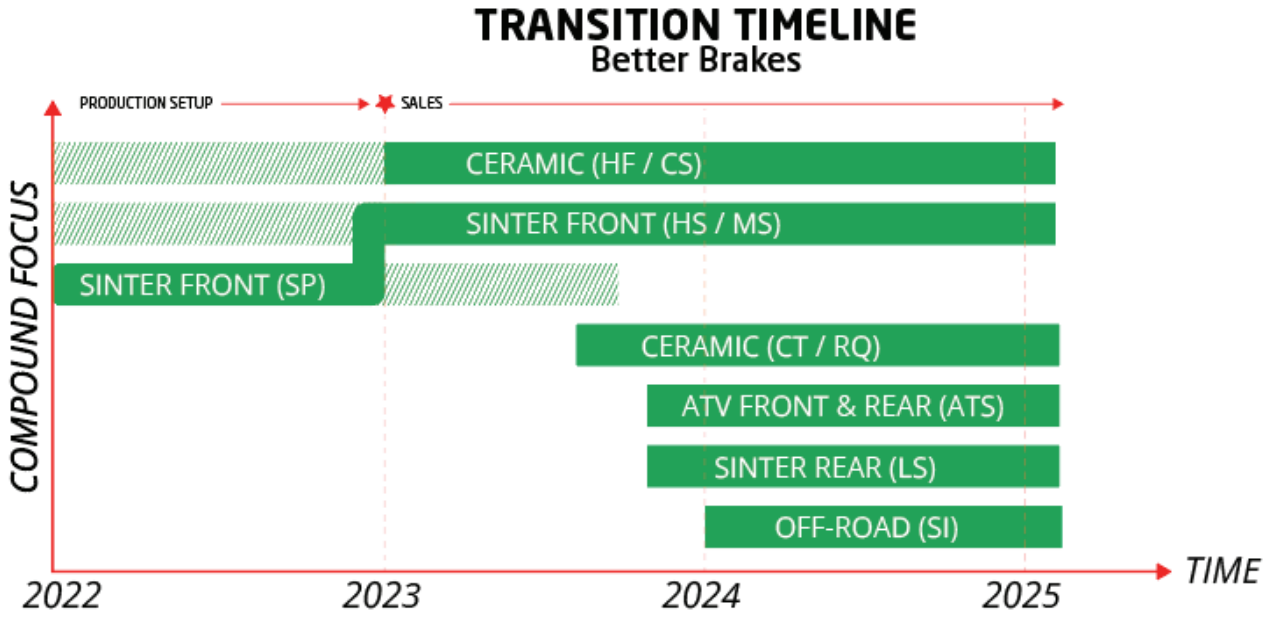

L'IDENTIFICATEUR

Pour différencier les anciens composés des nouveaux, SBS va apposer l'icône symbolique « Better Brakes » sur les emballages concernés. Notamment aussi parce que les références des produits (par ex. 706HS ou 146MS) resteront les mêmes, à la fois pour la commodité des pilotes, des revendeurs et des distributeurs.

PHASE DE TRANSITION

Les premiers produits à passer aux composés SBS Better Brakes sont les gammes HF, HS et MS. La production de la gamme SP s'arrêtera le 1er janvier 2023. Toutes les références de produits SP seront fusionnées dans la gamme HS, ce qui facilitera leur sélection, sur la base du principe « bon-mieux-meilleur ».

La prochaine étape du plan de transition, d'ici la mi-2023, sera la transition des produits RQ et CT, suivie de celle des produits LS puis, en 2024, des produits SI.

** Compounds can contain dust particles that may or may not contain levels of Copper, Nickel and Antimony. The compound terminology do not include backing plate coatings.*

** Les composés peuvent contenir des particules de poussière susceptibles ou non de renfermer une certaine quantité de cuivre, de nickel et d'antimoine. La terminologie des composés ne comprend pas les revêtements des plateaux de frein.*

NEW!
SBS BETTER BRAKES

IMPROVED PERFORMANCE CHARACTERISTICS

With SBS you can expect Braking Excellence, including the new SBS Better Brakes. Nothing less.

Improved stopping power (graph 1)
SBS Better Brakes enable better maneuverability in emergency situations. The metallics in the compounds enable an improved Coefficient of Friction that results in a more efficient brake grip throughout the braking sequence. The effect is an improved stopping power of up to 12% in braking distances.

Performance rating (graph 2)
Riders can expect a similar wear profile and an overall improved sense of grip and performance stability throughout the temperature spectrum. This means that riders can expect a 1:1 responsiveness between lever grip and speed reduction.

Heat performance (graph 3)
The new SBS Better Brakes compound has been designed to maintain performance even in intense braking situations. The average commuter most often brakes in a heat spectrum 100 - 300 degrees of the disc. The average riders can expect a consistent braking experience throughout the ride, throughout the heat range.

Fade Performance (graph 4)
Riders can expect an improved performance at the beginning of and throughout the ride, despite the heating up of the brake system. Riders will also get an improved grip feeling and an improved initial bite when braking.

NOUVEAUTÉ!
SBS BETTER BRAKES

PERFORMANCES AMÉLIORÉES ET CARACTÉRISTIQUES

En choisissant SBS, vous optez pour le freinage d'excellence. C'est plus que jamais le cas des nouveaux composés SBS Better Brakes. Rien de moins.

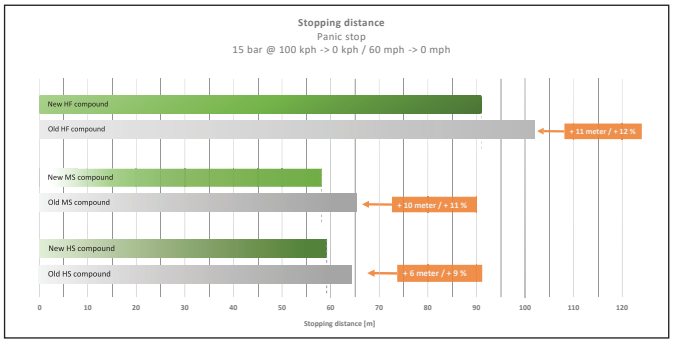

Puissance d'arrêt renforcée (graphique 1)
Les produits SBS Better Brakes offrent une meilleure maniabilité dans les situations d'urgence. Les particules métalliques contenues dans les composés permettent d'améliorer le coefficient de friction, ce qui se traduit par une adhérence plus efficace des freins tout au long du freinage. Le résultat est une amélioration de la puissance de freinage équivalente à 9 à 12 % de la distance de freinage.

Performances générales (graphique 2)
Les pilotes bénéficieront d'un profil d'usure similaire et d'une amélioration générale de l'adhérence et de la stabilité des performances, quelle que soit la température. Les conducteurs peuvent ainsi s'attendre à un rapport de réactivité de 1:1 entre l'action de freinage et la réduction de la vitesse.

Performances thermiques (graphique 3)
Le nouveau composé SBS Better Brakes a été conçu pour assurer des performances optimales même dans les situations de freinage intense. Le conducteur moyen freine le plus souvent dans une plage de températures des disques de frein comprise entre 100 et 300 degrés. Le pilote moyen pourra bénéficier d'une expérience de freinage constante tout au long de son trajet, sur toute la plage de températures.

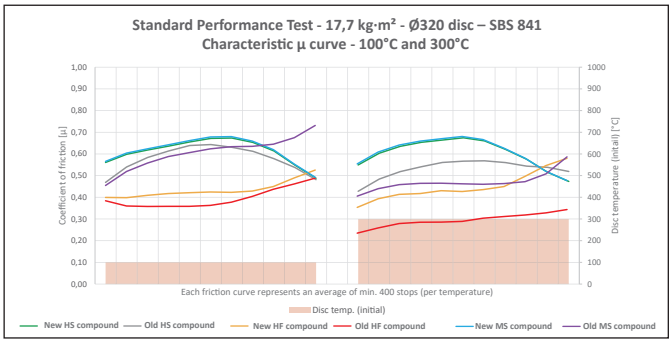

Performances en matière de fading (graphique 4)
Les pilotes profiteront d'une amélioration des performances dès le début et tout au long de leur trajet, et ce malgré l'échauffement du système de freinage. Ils bénéficieront également d'une sensation d'adhérence supérieure et d'un meilleur mordant initial au freinage.

UNIQUE TECHNOLOGY FEATURES

NRS TECHNOLOGY (NUCAP RETENTION SYSTEM)

SBS is 100% NRS SAFE! SBS conductive and sintered brake pads are all enforced with the premiere bonding technology in the market, NRS. The NUCAP Retention System (NRS) is a patented process where the backing plate surface is modified with a matrix of steel hooks that facilitate an indestructible mechanical bond between brake pad backing plate and the friction material, without any use of adhesives.

The main advantages of NRS technology compared to traditional bonding methods are:

// No separation between backing plate and friction material
// No lifting edges of the friction material giving a firm lever feel
// No vibration between the friction material and backing plate

ALSO FOR RACING

As the only manufacturer of racing pads, SBS has since the introduction of DC Dual Carbon in 2001 and DS Dual Sinter in 2007 used NRS technology for both the carbon and the sinter-based compounds. A special version of NRS have been developed to match the performance expectations of SBS brake pads for racing.

THE IDENTIFIER

Products with NRS can be identified with the NRS badge on the lower part of the packaging.

DES TECHNOLOGIES UNIQUES

NRS TECHNOLOGY (NUCAP RETENTION SYSTEM)

SBS : LA SÉCURITÉ 100 % NRS ASSURÉE ! Les plaquettes de frein conductrices et frittées SBS sont toutes renforcées par la technologie de liaison la plus innovante du marché, la technologie NRS. Le système de rétention NUCAP (NRS) est un procédé breveté consistant à modifier la surface de la plaquette de frein avec une matrice de crochets en acier afin d'assurer une liaison mécanique indestructible entre la plaquette de frein et le matériau de friction, sans utiliser aucun adhésif.

Principaux avantages de la technologie NRS par rapport aux méthodes de liaison traditionnelles :

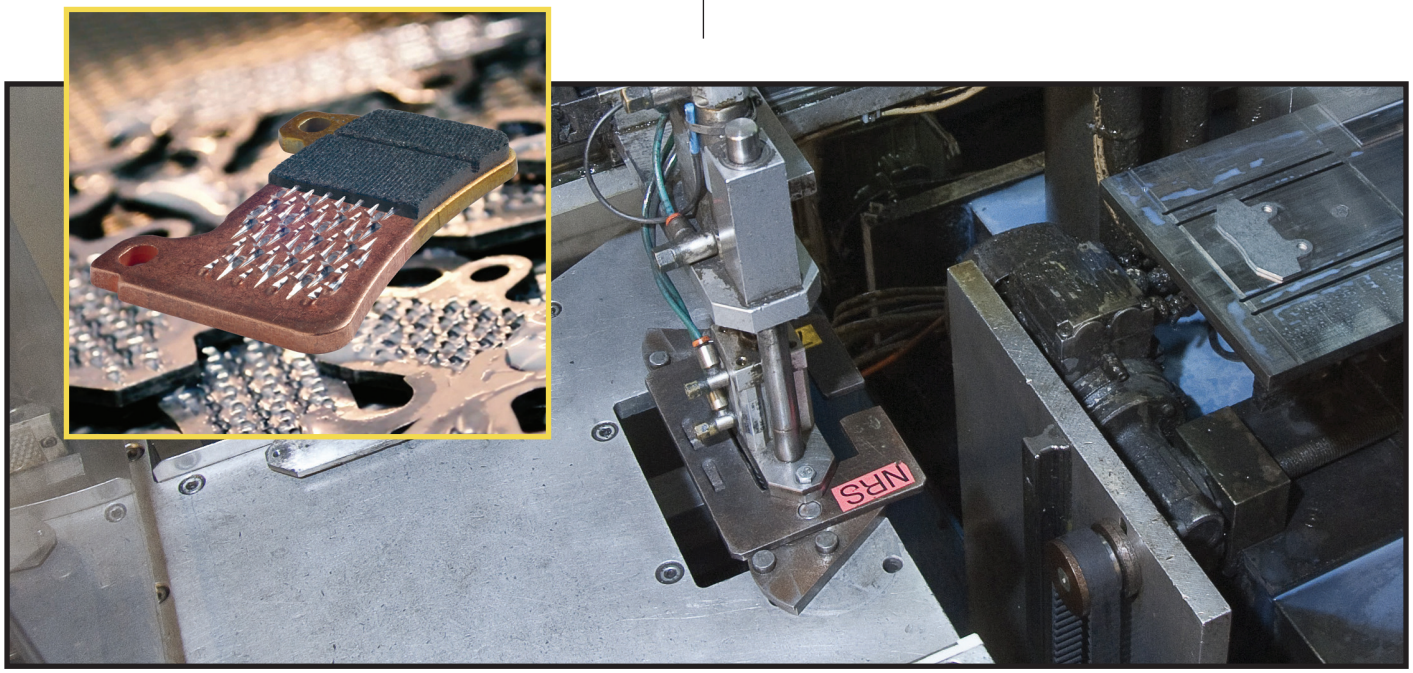

// Absence de séparation entre le plateau de frein et le matériau de friction.
// Absence de bords susceptibles de se soulever sur le matériau de friction et d'offrir un effet de levier.
// Absence de vibrations entre le plateau de frein et le matériau de friction.

CONVIENT ÉGALEMENT À L'UTILISATION EN COURSE

Seul fabricant de plaquettes de course, SBS utilise la technologie NRS pour les composés frittés et à base de carbone depuis l'introduction du DC Dual Carbon en 2001 et du DS Dual Sinter en 2007. Une version spéciale du NRS a été développée pour répondre aux attentes en matière de performances des plaquettes de frein SBS de course.

L'IDENTIFICATEUR

Les produits utilisant la technologie NRS peuvent être identifiés par le badge NRS apposé sur la partie inférieure de l'emballage.

LICENSE TO ADVENTURE
#STREETMOTORCYCLE

If a street bike is your preferred choice. If you are dedicated to touring and adventures in weekends and holidays. If you enjoy the freedom of motorcycle riding. Or if you are commuting every day.

Then SBS STREET brake pads are the right choice for you. Our STREET compounds are developed to match all makes, models and year of street bikes in the market – front and rear.

All brake pads are ECE R90 approved.

They give you the performance, durability and comfort that you need to GO AHEAD.

Choose between:
// PERFORMANCE – HS / LS
// STANDARD – HF

Follow our recommendations for the ideal pads for your bike.

Si votre routière est votre meilleure alliée. Si vous êtes friand de randonnées et d'aventures à moto pendant les week-ends et les vacances. Si vous aimez la liberté qu'offre la conduite d'une moto. Ou simplement si vous allez tous les jours travailler en moto.

Les plaquettes de frein SBS STREET sont alors faites pour vous. Nos composés STREET ont été développés pour s'adapter à toutes les marques, tous les modèles et toutes les générations de motos routières du marché, pour l'avant comme pour l'arrière.

Toutes les plaquettes de frein sont homologuées ECE R90.

Elles vous offrent les performances, la longévité et le confort dont vous avez besoin pour "GO AHEAD".

Choisissez entre les versions :
// PERFORMANCE – HS / LS
// STANDARD – HF

Suivez nos conseils pour trouver les plaquettes idéales pour votre moto.

PERFORMANCE

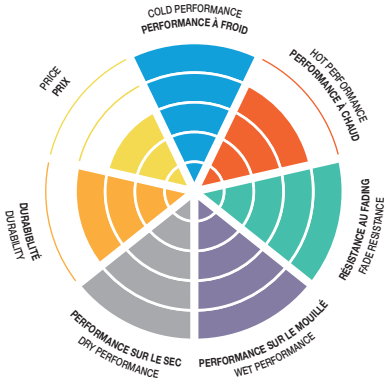

ECE R90 NRS SAFE BETTER BRAKES

HS - EVO SINTER

FRONT / AVANT

// OE replacement compound for bikes with sintered pads
// Designed for modern high performance, sport, big touring and adventure bikes
// Sintered compound formulated for low wear, high thermal stability, excellent brake feel and easy modulation
// Class-leading and high performance, developed in racing and fine-tuned for street use
// Excellent for stainless steel or cast iron brake discs
// Front (HS) and rear (LS) compounds for ideal brake balance, to avoid over-braking of rear-wheel
// Part of the new SBS Better Brakes transition

// Composé de rechange Haute Performance pour motos équipées d'origine de plaquettes frittées
// Conçu pour les motos modernes hautes performances sportives, routières ou destinées à l'aventure
// Composé fritté formulé pour une faible usure, une stabilité thermique élevée, une excellente sensation de freinage et une modulation facile
// Composé aux performances supérieures exceptionnelles, conçu pour la compétition et la route
// Idéalement adapté aux disques de frein en acier inoxydable ou en fonte
// Composés avant (HS) et arrière (LS) offrant un équilibre de freinage parfait pour supprimer le risque de blocage de la roue arrière
// Transition vers le nouveau composé SBS Better Brakes

Brake performance diagrams to be compared individually within STREET compounds only.

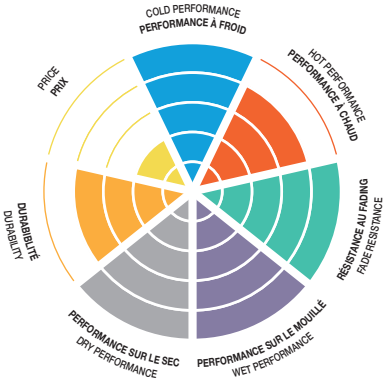

ECE R90 NRS SAFE BETTER BRAKES

LS - SINTER

REAR / ARRIÉRE

// OE replacement compound for bikes with sintered pads
// Designed for modern high performance, sport and big touring bikes
// Sintered compound offering predictable and controllable performance for rear wheel use
// Exclusive rear wheel compound formulated according to OEM concept offering ideal front/rear brake balance, to avoid over-braking of rear-wheel
// Part of the new SBS Better Brakes transition

// Composé de rechange pour motos équipées d'origine de plaquettes frittées
// Conçu pour les motos modernes hautes performances, sportives et routières
// Un composé fritté destiné aux roues arrière offrant des performances prévisibles et contrôlables
// Composé exclusif pour les roues arrière, formulé selon le concept OEM et offrant un équilibre de freinage avant/arrière optimal pour éviter un freinage excessif et le blocage de la roue arrière
// Transition vers le nouveau composé SBS Better Brakes

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants STREET.

STANDARD

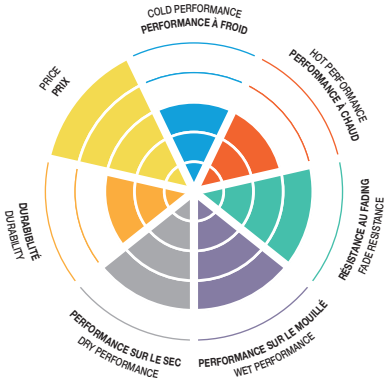

HF - CERAMIC

FRONT / AVANT • REAR / ARRIÉRE

// OE replacement compound for bikes with non-sintered pads
// Designed for commuters, general-purpose street and cruiser bikes
// Ceramic compound offers long pad life, low dust and low brake disc/ rotor wear
// Excellent, consistent performance in wet and dry conditions
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Innovative noise-reduction technology for high comfort and low development of noise
// Part of the new SBS Better Brakes transition

// Composé de rechange pour motos équipées d'origine de plaquettes non frittées
// Conçu pour les motos effectuant des trajets quotidiens, les motos routières polyvalentes et celles destinées aux longs périples
// Composé céramique offrant une longue durée de vie, peu de poussière et une faible usure du disque de frein/rotor
// Excellentes performances uniformes dans toutes les conditions, sèches ou humides
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé
// Technologie innovante de réduction du bruit pour un confort supérieur et une faible propagation du bruit
// Transition vers le nouveau composé SBS Better Brakes

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants STREET.

#VTWIN

If you have a passion for the American lifestyle, and the unique design and characteristics of the famous American motorcycle brands such as Harley Davidson, Buell and Indian, then SBS has the answer to your brake needs.

Our range of brake pads developed especially for American made motorcycles features compounds that unite high power with low noise and long lifetime. Our range has full coverage - vintage models back from the 80s as well as brand new American built bikes.

All brake pads are ECE R90 approved.

Choose between:
// HIGH PERFORMANCE & NO DUST – H.HS / H.LS
// HIGH POWER & NOISE REDUCTION FORMULA – H.CT
// ULTRA QUIET & LOW DUST – H.HF

Follow our recommendations for the ideal pads for your bike.

Si vous êtes passionné par le style de vie américain et par le design et les caractéristiques uniques des célèbres marques de motos américaines comme Harley Davidson, Buell ou Indian, alors SBS a la solution qu'il vous faut en matière de freinage.

Notre gamme de plaquettes de frein spécialement conçue pour les motos américaines utilise des composés associant puissance élevée, bruit réduit et durée de vie prolongée. Notre gamme offre une couverture complète : des modèles vintage des années 80 aux toutes dernières motos des marques américaines.

Toutes les plaquettes de frein sont homologuées ECE R90.

Choisissez entre les versions :

#URBANMOBILITY

When it comes to city traffic, a scooter is often the ideal vehicle. In the dense traffic you have to rely on your brakes. The SBS scooter brake pads offer the ideal brake performance and durability for this environment.

We offer different compounds for most types of scooters and riding needs. Our market coverage is wide with pads and compounds from small 50 ccm models to modern, high performance maxi scooters.

Most brake pads are ECE R90 approved.

Choose between:
// MAXI SINTER – MS
// STANDARD & MAXI – CT
// STANDARD & MAXI – HF

Follow our recommendations for the ideal pads for your scooter.

En ville, le scooter est souvent le véhicule idéal. Quand la circulation est dense, vous devez pouvoir compter sur vos freins. Les plaquettes de frein SBS Scooter offrent les performances de freinage et la longévité idéales pour cet environnement.

Nous proposons une variété de composés pour la plupart des modèles de scooter et des types de conduite. Notre large gamme comprend des plaquettes et des composés allant des petits modèles 50 cm^3 jusqu'aux maxi scooters modernes hautes performances, pour couvrir tout le marché.

La plupart des plaquettes de frein sont homologuées ECE R90.

Choisissez entre les versions :
// MAXI SINTER – MS
// STANDARD & MAXI – CT
// STANDARD & MAXI – HF

Suivez nos recommandations pour trouver les plaquettes idéales pour votre scooter.

MAXI SINTER / MAXI

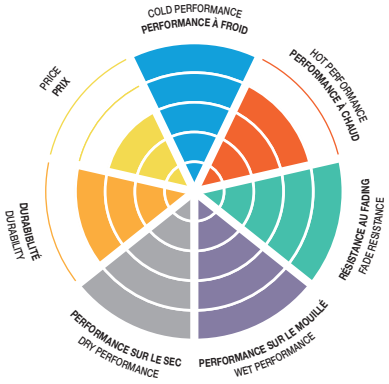

MS - SINTER

FRONT / AVANT • REAR / ARRIÉRE

// High performance upgraded sintered compound for Maxi scooters from 250 ccm and up
// Recommended for Maxi scooters equipped with motorcycle technology
// State-of-the-art sintered compound formulated for low wear, high thermal stability and excellent brake feel
// Part of the new SBS Better Brakes transition

// Composé fritté Haute performance destiné aux maxi scooters de 250 cm³ et plus
// Recommandé pour les maxi scooters équipés d'une technologie type moto
// Composé fritté à la pointe de la technologie formulé pour une faible usure, une stabilité thermique élevée et une excellente sensation de freinage
// Transition vers le nouveau composé SBS Better Brakes

Brake performance diagrams to be compared individually within SCOOTER compounds only.

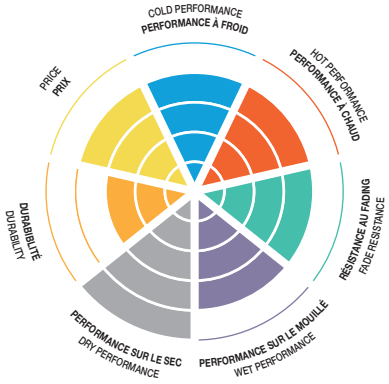

CT - CARBON

FRONT / AVANT • REAR / ARRIÉRE

// Performance upgrade carbon compound for medium size scooters 125-249 ccm
// Recommended for sporty riding, everyday transportation and fun
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Part of the new SBS Better Brakes transition

// Composé carbone Haute Performance destiné aux scooters de taille moyenne (125 à 249 cm³)
// Recommandé pour la conduite sportive, les trajets quotidiens et le plaisir
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé
// Transition vers le nouveau composé SBS Better Brakes

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants SCOOTER.

STANDARD & MAXI

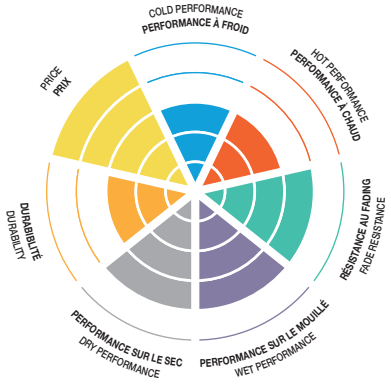

HF - CERAMIC

FRONT / AVANT • REAR / ARRIÉRE

// OE replacement ceramic compound for small and medium size scooters 50-124 ccm
// Recommended for commuters and general-purpose street riding
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Part of the new SBS Better Brakes transition

// Composé céramique de rechange destiné aux scooters de taille petite à moyenne (50-124 cm³)
// Recommandé pour les trajets quotidiens
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé
// Transition vers le nouveau composé SBS Better Brakes

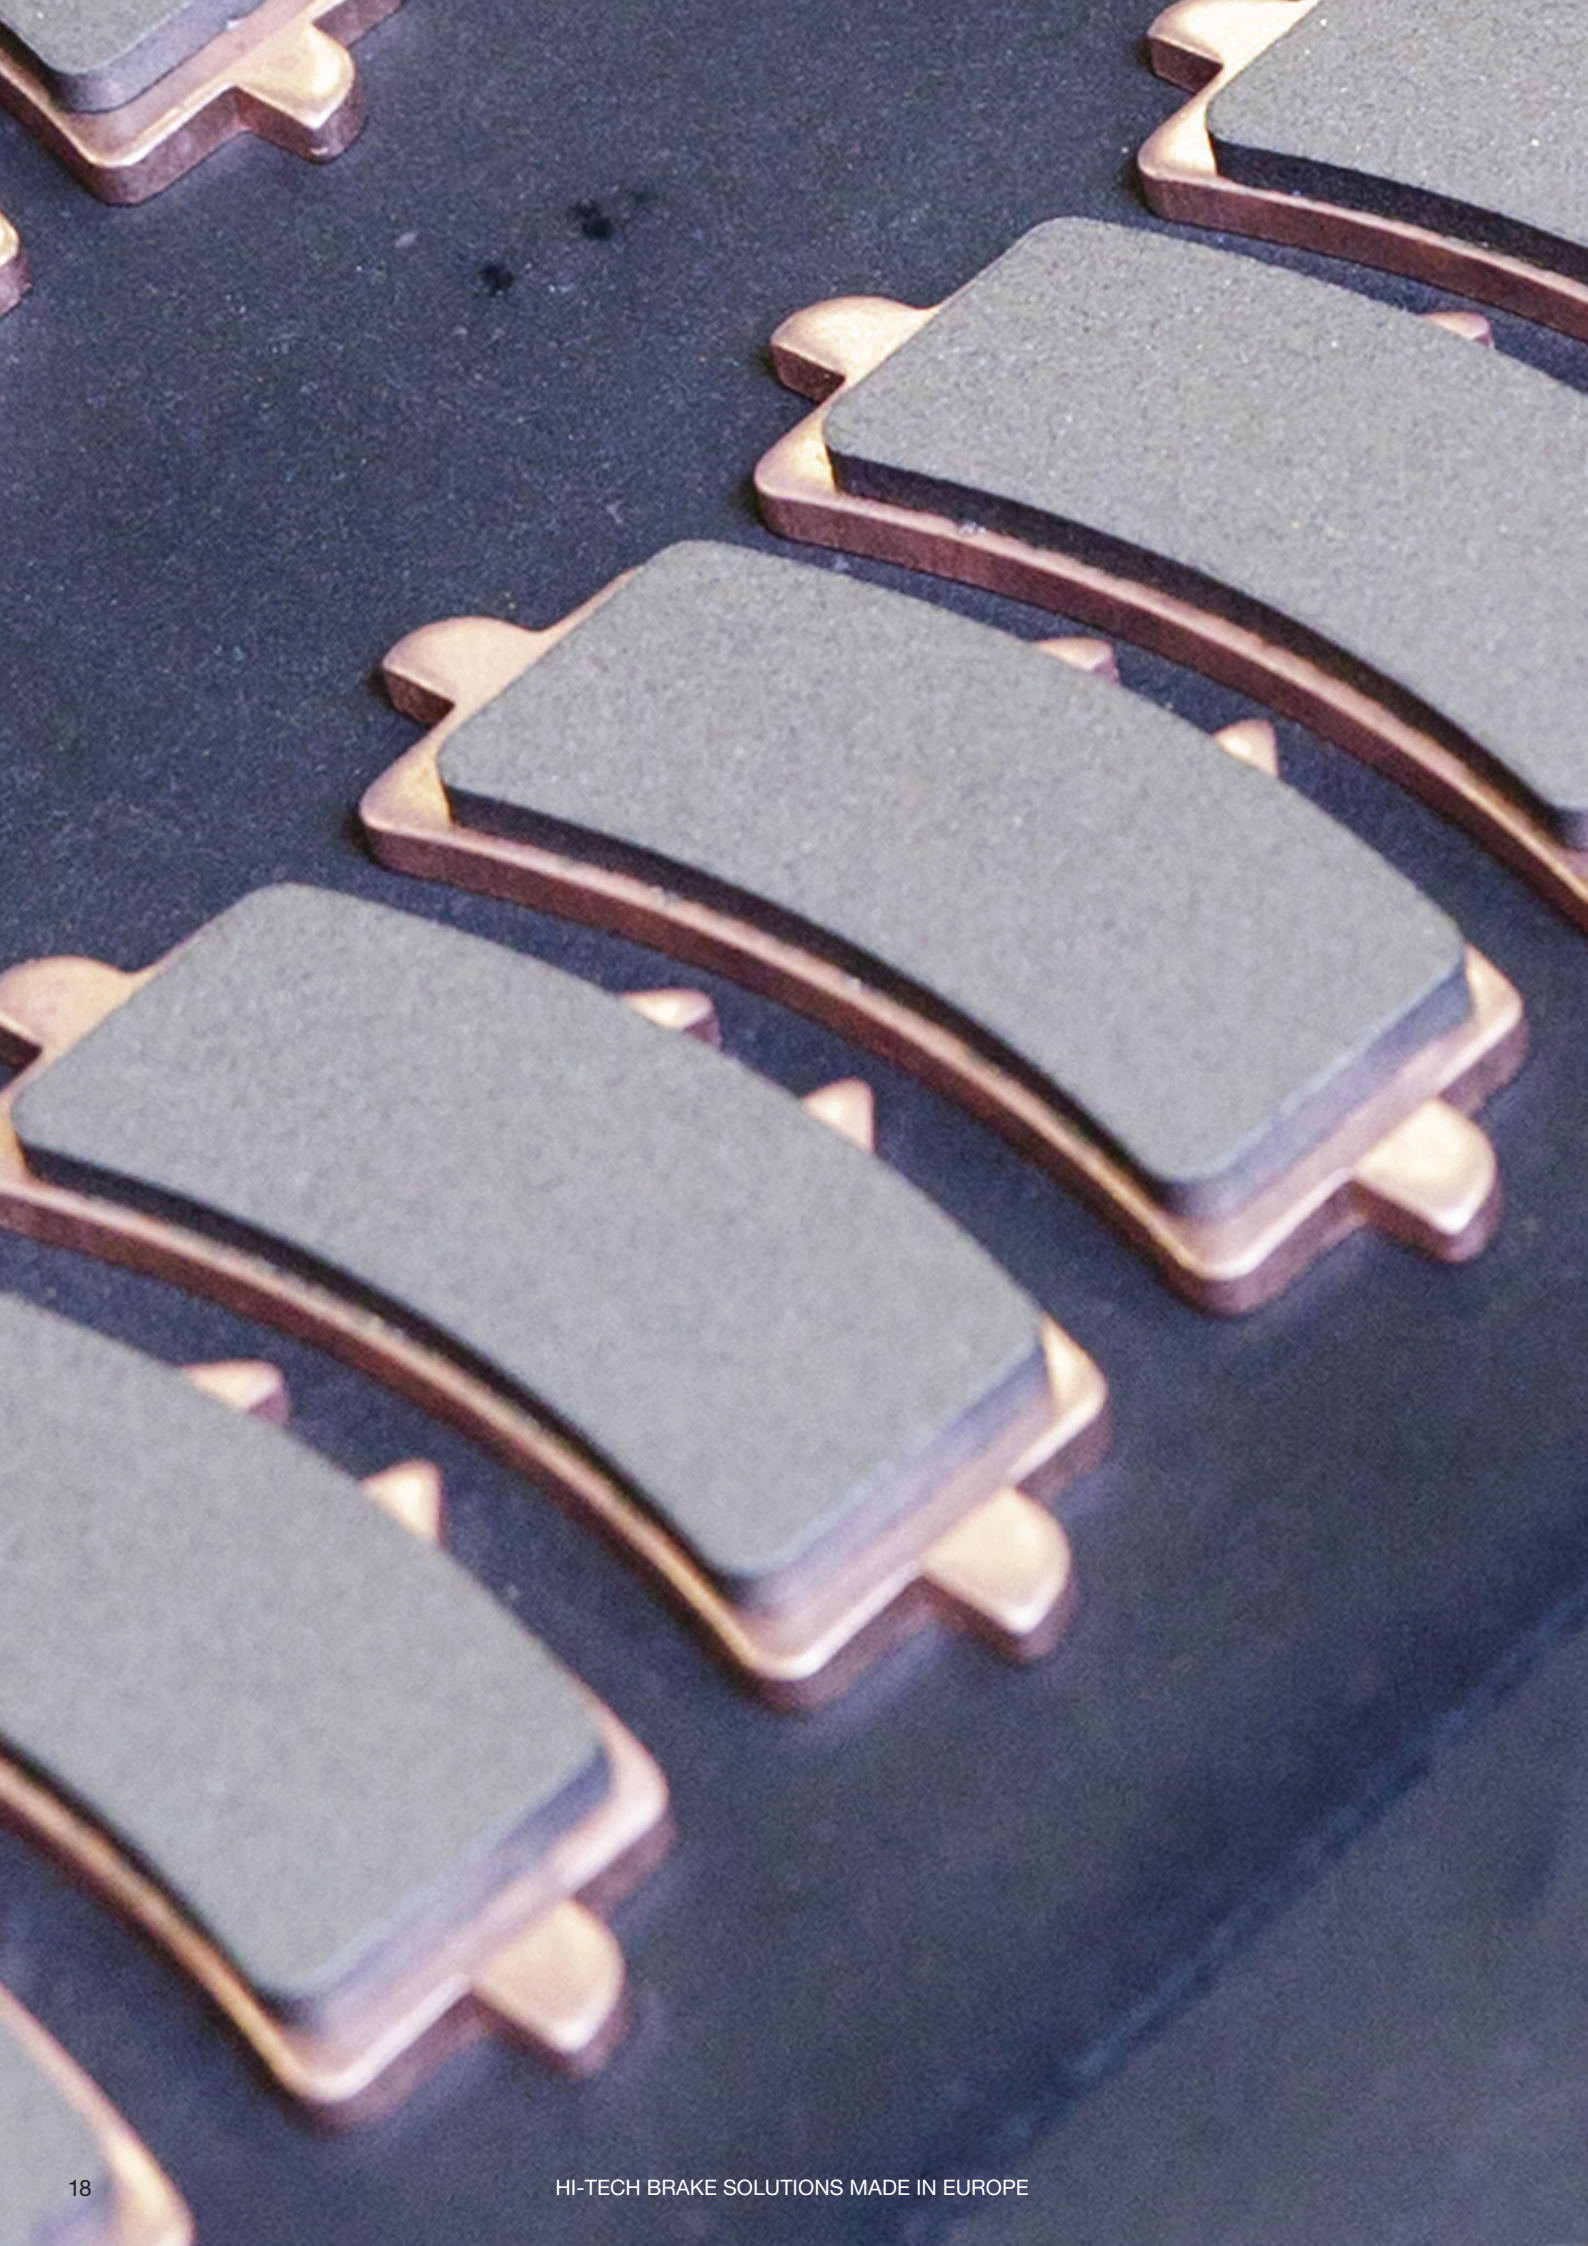

Brake performance diagrams to be compared individually within SCOOTER compounds only.

DOMINIQUE AEGERTER

For more than 25 years racing has been part of our DNA.

Through our Partners in Racing concept, we deliver the stopping power to the world's best championship riders. Whether it comes to international top level road racing such as Superbike, Supersport or Endurance, national competitions, track days or classic road racing, SBS offers you the brake pads you need for winning important 100th of seconds when braking. Our race compounds are specially developed for competition and race track use – tested and approved by some of the best World Championship riders.

Full blood race pads can not be ECE R90 approved. All racing pads besides LS are enforced with NUCAP NRS technology.

Choose between:
// DYNAMIC RACING CONCEPT – DS-1 & DS-2
// ROAD RACING & CLASSIC RACING – DC / DCC
// ROAD RACING & TRACK DAYS – RST
// RACING REAR – RQ / LS

Follow our recommendations for the ideal pads for your bike.

Depuis plus de 25 ans, la course fait partie de notre ADN.

À travers notre concept « Partenaires de compétition », nous offrons la puissance de freinage ultime aux meilleurs pilotes du Championnat du monde. Qu'il s'agisse des plus grandes courses sur route comme les compétitions Superbike, Supersport ou Endurance, les compétitions nationales, les courses sur circuit ou les classiques routières, SBS vous propose les plaquettes de frein dont vous avez besoin pour gagner d'importants 100èmes de seconde au freinage. Nos composés de course sont spécialement conçus pour la compétition et les circuits de course. Ils sont testés et approuvés par les plus grands pilotes du Championnat du monde.

Les plaquettes de frein spécial course ne peuvent pas être homologuées ECE R90. Toutes les plaquettes de course en plus des LS sont renforcées grâce à la technologie NUCAP NRS.

Choisissez entre les versions :
// DYNAMIC RACING CONCEPT – DS-1 & DS-2
// ROAD RACING & CLASSIC RACING – DC / DCC
// ROAD RACING & TRACK DAYS – RST
// RACING REAR – RQ / LS

Suivez nos recommandations pour trouver les plaquettes idéales pour votre moto.

PROFESSIONAL RACING / ENDURANCE, CLASSIC RACING & ROAD RACING

PROFESSIONAL RACING

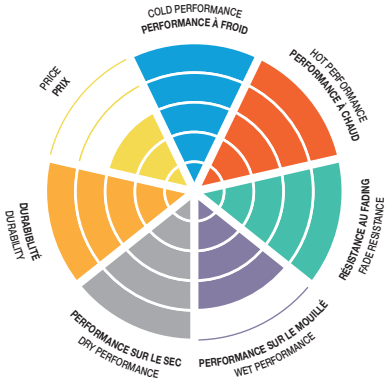

DS-1 & DS-2
DYNAMIC RACING CONCEPT

FRONT / AVANT - FOR RACE USE ONLY

// The choice of numerous World Champions in Superbike, Supersport, Moto2 and Endurance
// High-tech sintered compound available for racing & standard brake systems used in racing
// DS-1 with an aggressive initial bite features and linear predictable in-stop performance
// DS-2 with a smooth initial bite and progressive in-stop performance
// A combination (left and right) of the two compounds makes fine tuning of braking performance possible
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Le choix de nombreux champions du monde en Superbike, Supersport, Moto2 et Endurance
// Composé fritté haute technologie adapté aux systèmes de freinage de course et standard utilisés en compétition
// DS-1 Si vous préférez une réponse au freinage puissante et linéaire
// DS-2 Si vous préférez une réponse au freinage en souplesse et progressive
// Il est désormais possible d'associer les deux types; Disque de frein côté gauche -> DS-1, disque de frein côté droite -> DS-2. On obtient ainsi une combinaison des caractéristiques de performance des deux types
// C'est-à-dire, un réglage fin des performances de freinage selon les préférences de freinage de chaque pilote
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé

Brake performance diagrams to be compared individually within RACING compounds only.

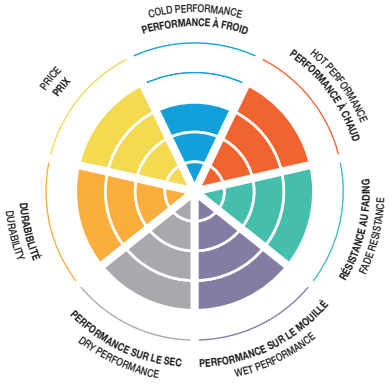

DC - DUAL CARBON

FRONT / AVANT - FOR RACE USE ONLY

// The upgrade choice for Superbike, Supersport and Superstock racers in National Championship as well as for Track Day riders
// High-tech carbon compound developed for racing and standard brake systems used for race and sport bikes
// Low heat transfer rate protects brake system and brake fluid against extreme temperatures
// Smooth initial bite, progressive in-stop performance with excellent brake lever feel and modulation
// DEST technology used for pre-bedding of the compound to eliminate fade and secure consistent performance
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Le composé de choix pour les pilotes de Superbike, Supersport et Superstock des championnats nationaux mais aussi pour les journées sur circuit ("Track days")
// Composé carbone haute technologie développé pour les systèmes de freinage de course et standard utilisés sur les motos de compétition et sportives
// Le faible taux de transfert de chaleur protège le système de freinage et le liquide de frein contre les températures extrêmes
// Mordant fluide, performances de freinage progressives avec une excellente sensation au niveau du levier de frein et une excellente modulation
// Technologie DEST utilisée pour la pré-application du composé afin d'éliminer le fading et d'assurer des performances uniformes
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants RACING.

ENDURANCE, CLASSIC RACING & ROAD RACING / ROAD RACING & TRACKDAYS

RACING
CLASSIC ROAD RACING

DCC - DUAL CARBON

FRONT / AVANT - FOR RACE USE ONLY

// The choice for classic road racing derived from more than 25 years of experience in World Championship racing and inspired by our championship winning DC Dual Carbon material
// Smooth initial bite, ideal for classic front fork construction and tires. Progressive brake performance offering superior power and front-end feel
// Thermal stability, suitable for 1 & 2 disc set-up. Compatible with stainless steel and cast iron brake discs
// Low thermal conductivity reduces thermal load to seals, brake fluid and caliper parts
// DEST technology used for pre-bedding of the compound to eliminate fade and secure consistent performance
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Le choix qui s'impose pour les courses classiques sur route s'appuie sur plus de 25 ans d'expérience en Championnat du monde, inspiré par notre matériau carbone gagnant DC Dual Carbon
// Mordant fluide, idéal pour les fourches et les pneus avant classiques. Performances de freinage progressives offrant une puissance supérieure et une sensation avant-arrière optimale
// Stabilité thermique, adaptée aux configurations à 1 et 2 disques. Compatible avec les disques de frein en acier inoxydable et en fonte
// Faible conductivité thermique réduisant la charge thermique exercée sur les joints, le liquide de frein et les pièces des étriers
// Technologie DEST utilisée pour la pré-application du composé afin d'éliminer le fading et d'assurer des performances uniformes.
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé

Due to the unique nature of the DCC compound, formulated especially for vintage racing, it is not possible to compare to other products.

En raison de la nature unique du composé DCC, formulé spécialement pour les courses de motos vintage, toute comparaison avec d'autres produits est impossible.

ECE R90

RST - SINTER

FRONT / AVANT

// The ideal and affordable choice for track days and for combined road and track bike
// Sintered compound available for modern sport- and cup-bike standard brake systems
// Excellent for stainless steel or cast iron brake discs
// Strong initial bite, linear in-stop performance with good brake feel and control

As of 2020 the RST range replaced RS pads 1:1, when it comes to fitment of applications. However, with increased braking power and even better brake feel and control. Riders just have to be aware of a slightly increased bedding-in time compared to RS due to the increased durability. All RST pads are enforced with NRS. The NRS Nucap Retension System is an advanced mechanical bonding technology based on a matrix of steel hooks raised from the baking plate steel material. The NRS hooks mold into the friction material creating an indestructible and corrosion safe mechanical bond without any use of adhesives. Main advantages of NRS technology:
// No separation between the back plate and friction material
// No lifting edges of the friction material giving a firm lever feel
// No vibration between the friction material and back plate

// Le choix économique idéal pour les journées sur pistes (track days) et les motos combinant pistes et routes
// Composé fritté adapté aux systèmes de freinage standard des motos sportives et de course modernes
// Idéalement adapté aux disques de frein en acier inoxydable ou en fonte
// Mordant puissant, performances de freinage avec une bonne sensation de freinage et un contrôle maîtrisé

Depuis 2020, la gamme RST a remplacé les plaquettes de frein RS 1:1, pour le montage d'applications. Avec cependant une puissance de freinage supérieure et même plus de contrôle et de sensations au freinage. Les pilotes doivent simplement savoir que le temps de rodage est légèrement plus long par rapport à celui des RS, à cause du gain de résistance. Toutes les plaquettes de frein RST sont renforcées grâce au système NRS. Le système de rétention NRS (Nucap Retention System) est une technologie de liaison mécanique avancée basée sur une matrice de crochets en acier redressés sur le plateau de frein en acier. Les crochets NRS viennent se mouler dans le matériau de friction, créant ainsi une liaison mécanique indestructible sans utiliser d'adhésif. Les principaux avantages de la technologie NRS :
// Absence de séparation entre le plateau de frein et le matériau de friction
// Absence de bords susceptibles de se soulever sur le matériau de friction et de provoquer un effet de levier solide
// Absence de vibrations entre le plateau de frein et le matériau de friction

ENDURANCE, CLASSIC RACING & ROAD RACING

RQ - CARBON TECH

REAR / ARRIÉRE

// Rear brake carbon compound with high brake performance
// Excellent feel and control to use rear brake steering into turns and handle the bike out of turns
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Part of the new SBS Better Brakes transition

// Composé carbone pour frein arrière offrant d'impressionnantes performances de freinage
// Excellente sensation et contrôle aisé du frein arrière dans les virages, offrant une parfaite maîtrise de la moto en sortie de virage
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé
// Transition vers le nouveau composé SBS Better Brakes

LS - SINTER

REAR / ARRIÉRE

// Rear brake sintered compound with medium brake performance and long pad life
// Recommended for riders using the rear brake occasionally or only slightly entering the turns
// Part of the new SBS Better Brakes transition

// Composé fritté pour frein arrière offrant des performances de freinage intermédiaires et une longue durée de vie de plaquettes
// Recommandé pour les motards utilisant occasionnellement le frein arrière ou légèrement à l'entrée des virages
// Transition vers le nouveau composé SBS Better Brakes

LICENSE TO ACTION
#OFFROADBIKE

Enjoying the freedom in the desert. Conquering rocks and mountains. Racing down the dirt track for podium positions.

When riding off road is your passion, SBS offers you the ideal brake compound for the aggressive environment of sand, dust, mud and water. Whether on motorcycle, ATV or UTV.

Choose between our racing pads for competition at all levels or the alternatives when riding off road for leisure and fun. Our range covers all off road makes and models and of course for both front and rear applications.

Most brake pads are ECE R90 approved.

Choose between:
// UPGRADE & RACING – RSI / PSI
// CLUB, TRAILS & LEISURE – SI / CS / ATS

Follow our recommendations for the ideal pads for your bike.

Apprécier la liberté dans le désert. Conquérir les collines et les montagnes. Avaler les kilomètres de pistes poussiéreuses jusqu'au podium.

Si la conduite hors des sentiers battus est votre passion, SBS propose un composé de frein idéal pour les environnements agressifs mêlant sable, poussière, boue et eau. Que ce soit pour les motos, les quads ou autres VU Tout Terrain.

Choisissez parmi nos plaquettes spéciales course pour la compétition à tous les niveaux ou d'autres versions adaptées à la conduite tout terrain pour les loisirs et le plaisir. Notre gamme couvre toutes les marques et tous les modèles tout terrain, à la fois pour les applications avant et arrière.

La plupart des plaquettes de frein sont homologuées ECE R90.

Choisissez entre les versions :
// UPGRADE & RACING – RSI / PSI
// CLUB, TRAILS & LEISURE – SI / CS / ATS

Suivez nos recommandations pour trouver les plaquettes idéales pour votre moto.

RSI - SINTER

FRONT / AVANT • REAR / ARRIÉRE

// Performance upgrade choice of MX GP World Championship MX GP and MX2 teams and riders
// Sintered compound formulated for high thermal stability, powerful and predictable fade-free performance
// Compatible with OE standard brake discs and specially designed racing discs
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Le choix Haute Performance des teams et des pilotes du Championnat du monde MX GP et MX2
// Composé fritté formulé pour une stabilité thermique élevée, une puissance supérieure et des performances prévisibles sans fading
// Compatible avec les disques de frein OE standard et les disques spécialement conçus pour la course
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé

Brake performance diagrams to be compared individually within OFF ROAD compounds only.

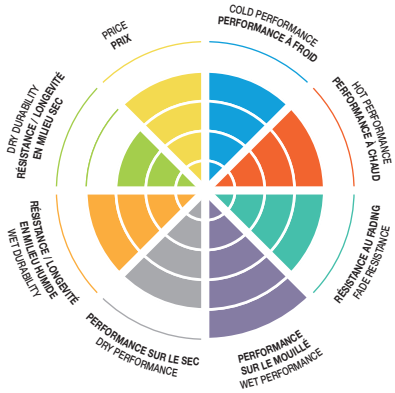

SI - SINTER

FRONT / AVANT • REAR / ARRIÉRE

// The upgrade choice for muddy, wet or sandy conditions
// Sintered compound formulated for extended service intervals, high performance and easy modulation
// Class-leading smooth performance developed in racing under severe conditions
// Part of the new SBS Better Brakes transition

// Le choix idéal pour la boue, les terrains humides et le sable
// Composant fritté formulé pour des intervalles d'entretien prolongés, des performances élevées et une modulation facile
// Composé aux performances d'une fluidité inégalée, conçu pour la compétition dans les conditions les plus difficiles
// Transition vers le nouveau composé SBS Better Brakes

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants OFF ROAD.

UPGRADE & RACING / CLUB, TRAILS & LEISURE

PSI - EVO SINTER

FRONT / AVANT • REAR / ARRIÉRE

// Ultimate upgrade compound for ATVs and UTVs
// State-of-the-art conductive sintered EVO compound formulated for strong initial bite to give instant brake feeling, easy modulation and powerful in-stop performance
// Fade free, consistent and reliable performance under extreme conditions and throughout brake pad lifetime
// NRS Technology secures a mechanical and indestructible bonding of the compound
// Full-range availability completed Q1 2021

// Composé de rechange Haute performance pour les VTT et les UTV
// Composé EVO fritté conducteur à la pointe de la technologie, formulé pour offrir un freinage instantané et puissant, et une modulation facile
// Des performances fiables, uniformes et exemptes de fading même dans des conditions de conduite extrêmes et durant toute la durée de vie des plaquettes de frein
// La technologie NRS assure une liaison mécanique indestructible du composé
// Disponibilité de la gamme complète terminée Q1 2021

Brake performance diagrams to be compared individually within OFF ROAD compounds only.

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants OFF ROAD.

ATS - SINTER

FRONT / AVANT • REAR / ARRIÉRE

// OE replacement compound for combination with plain steel brake discs
// Sintered compound compatible with OE standard plain steel brake discs as used with older Arctic Cat & Polaris ATV models
// Part of the new SBS Better Brakes transition

// Composé de rechange à associer à des disques de frein en acier
// Composé fritté compatible avec les disques de frein en acier standard d'origine comme ceux utilisés sur les anciens modèles de quads Arctic Cat et Polaris
// Transition vers le nouveau composé SBS Better Brakes

CS - CARBON

FRONT / AVANT • REAR / ARRIÉRE

// Affordable replacement choice for hobby motocross and competition
// Carbon compound offers smooth, quiet and non-grabbing performance
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Part of the new SBS Better Brakes transition

// Composé de rechange abordable, idéal pour le motocross de loisir et de compétition
// Composé carbone offrant des performances fluides, silencieuses et sans broutage
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé
// Transition vers le nouveau composé SBS Better Brakes

BRAKE SHOES WITH SPRINGS

MÂCHOIRES DE FREIN À RESSORTS

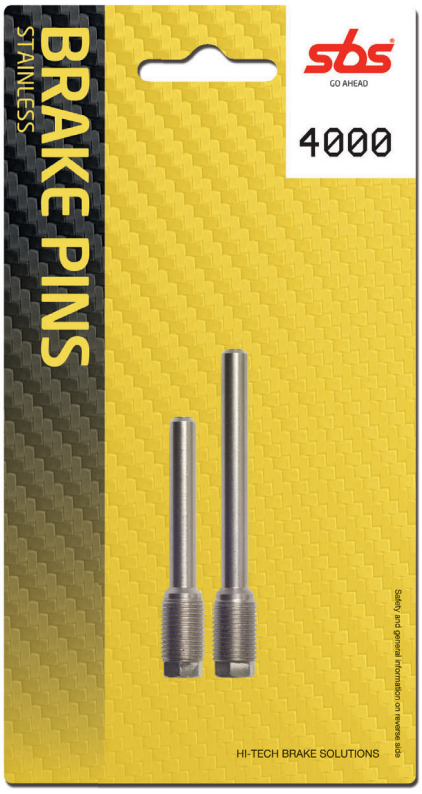

Asbestos-free brake lining for superior performance and durability under all weather conditions. High grade alloy for superior strength. Surface treated against corrosion. Brake shoe springs made of high quality spring wire steel according to DIN 17223 specifications for max. flexibility.

Garniture de frein sans amiante pour des performances et une longévité supérieures quelles que soient les conditions météo. Alliage haute qualité pour une résistance supérieure. Surface traitée contre la corrosion. Ressorts de mâchoires de frein fabriqués en fil d'acier conforme à la norme DIN 17223 pour une flexibilité maximale.

STAINLESS BRAKE PINS

AXES DE FREIN INOXYDABLES

The SBS stainless brake pin range covers the most common MX and Enduro bikes from the early 1990s until today.

The range comprises 5 complete sets, front and rear together, but are also available as single packs with only front or rear to the respective model. Brake pad pins get wear grooves after a while so it is recommended to replace them regularly in order to prevent stiction and poor performance.

// Made of high quality stainless steel 304
// 8 mm hex head for quick and easy change of brake pad (excl. ref 4003)
// Corrosion resistant
// Smooth sliding between pin and brake pads

La gamme d'axes de frein inoxydables SBS est adaptée aux motos MX et Enduro les plus courantes du début des années 1990 à aujourd'hui.

Cette gamme comprend 5 jeux complets, avant et arrière, également disponibles en packs unitaires contenant uniquement un axe avant ou arrière du modèle souhaité. Comme les axes des plaquettes de frein développent des rainures d'usure après un certain temps, il est recommandé de les remplacer régulièrement afin d'éviter le frottement au démarrage et de faibles performances.

// Acier inoxydable de haute qualité "304"
// Tête hexagonale de 8 mm pour un changement rapide et facile des plaquettes de frein (sauf réf. 4003)
// Résistance à la corrosion
// Glissement fluide des axes contre les plaquettes de freins

ACCESSORIES

ACCESOIRES

BRAKE SYSTEM BLEEDER

Motorcycle brake system bleeder which allows quick, safe and clean exchange of brake fluid. Access to min. 6 bar air pressure is necessary. The bleeder is made of the best and most durable brake fluid resistant materials which means that it handles the highly corrosive brake fluid in a closed circuit. A special safety and “tip-over” valve, prevents the fluid to atomize when the container is full.

// Built-in ”tip-over” valve
// Turnable line fitting
// Additional 2-nipple line included
// Manual in 12 languages

Part number 5809839100
EPDM rubber units
Art. number 5809939100 (10 pcs.)

PURGEUR DE FREIN

Purgeur de système de freinage de moto permettant une vidange rapide, propre et sûre du liquide de frein. Nécessite de l’air comprimé à 6 bars minimum. Le purgeur est fabriqué avec les matériaux les plus durables résistant au liquide de frein, car il doit pouvoir supporter le liquide de frein hautement corrosif du circuit fermé. Une valve de sécurité spéciale « anti-refoulement » empêche le liquide de se vaporiser lorsque le réservoir est plein.

// Valve « anti-refoulement » intégrée
// Sens de fixation réversible
// Fourni avec 2 embouts supplémentaires
// Manuel disponible dans 12 langues

Réf. 5809839100
Embouts en caoutchouc EPDM
Réf. 5809939100 (10 pièces)

ANTI-NOISE SHIMS

// Vibration/noise resistant
// Temperature transfer resistant
// Piston protective
// Better brake feel
// Do not use for racing

Part number 9500

SHIMS POUR PLAQUETTES DE FREIN

// Résistants aux vibrations/bruit
// Résistants au transfert de température
// Protection du piston
// Sensations de freinage améliorées
// Ne pas utiliser pour la course

Part number 9500

GO AHEAD

HI-TECH BRAKE SOLUTIONS
MADE IN EUROPE

@sbsbrakes . sbsbrakes . #GoAhead

HI-TECH BRAKE SOLUTIONS MADE IN EUROPE

At SBS, we develop and manufacture hi-tech brake solutions.

Our ranges of brake pads, brake discs, brake shoes, clutch kits and other important parts cover all relevant motorcycles, scooters and ATV/UTVs on the market, regardless of make and model. SBS is your single source for brake parts and components.

We are a global market leader within brakes for powered two-wheelers. Our R&D department continuously innovates with new materials and technologies to achieve ultimate performance, longer lifetime, higher comfort and more eco-friendly products.

Our products are tested by reality. Dynamometer testing is supplemented with numerous street and race track tests. We work together with some of the world's best road racing and motocross riders, when they race towards podium positions.

We create the power to stop you. Made in Europe. You decide where and how to use it. Go Ahead!
